THOROUGHbred SOFTWARE RELEASES *Solution-IV*TM ACCOUNTING ON LINUX

Somerset, New Jersey, November 15, 1999 – Thoroughbred Software International, Inc., a leader in Object Oriented applications development, announced today the availability of their *Solution-IV* accounting system on the Linux operating system. *Solution-IV* is also available on UNIX, Windows 95/98/NT, and VMS. Thoroughbred will be demonstrating *Solution-IV* at COMDEX in booth #317 at the Linux Business Expo in the Las Vegas Hilton.

Solution-IV is a completely integrated financial accounting and distribution system including the following modules: General Ledger, Accounts Payable, Accounts Receivable, Order Processing, Inventory Control, Payroll, Purchase Order, Bank Reconciliation, Fixed Assets, Fund Accounting, Prospect Management, Source Toolkit and System Utilities. Designed in Thoroughbred's OPEN*workshop*TM Object Oriented development environment, *Solution-IV* is a robust financial system for back office accounting and distribution markets.

Solution-IV is scaleable, and supports small to large company requirements capable of supporting hundreds of users. "*Solution-IV* is a system that will grow with your company." said Mark Lewis, Thoroughbred's Vice President of Sales and Marketing. "*Solution-IV* is Y2K and Internet Ready" Lewis added.

Thoroughbred Software's OPEN*workshop* development environment enables Rapid Application Development (RAD) for any customization that may have to be done for special customer requirements. "*Solution-IV* is completely operational as a host or network-based system for smaller cost effective applications and supports a client-server architecture for larger enterprise wide application requirements.

Solution-IV is open an database and supports both a Graphical User Interface (GUI) or character "text mode" user interface. Additional support products are included or available for *Solution-IV* including: *Report-IV*TM, a custom reportwriter; *Query-IV*TM, a SQL based query tool; TS ReportServerTM and TS ChartServerTM, Windows workstation based user tools for report and chart production and display; TS ODBC DataServerTM, providing *Solution-IV* database connectivity to ODBC compliant applications, and TS ORACLE DataServerTM, providing direct client-server access to Oracle databases and tools.

About Thoroughbred

Thoroughbred Software International, Inc. develops and markets software development systems including Thoroughbred *Basic*[™], *OPENworkshop* (OOP), *Solution-IV* Financial Applications, Web based servers and applications and supports a community of over 1,000 value added resellers and partners worldwide.
