TS ODBC DataServer™ 4.0.2A

The following items are known issues.

1. The Selection Criteria report may fail with an error 47. It will run from an IDOL-IV™ menu by entering `.odRSELCR` at the menu prompt.
2. An error accessing data may occur when using the Single-Tier product while a *Basic* 8.4.0 window is open. Closing the *Basic* window will eliminate the problem.
3. An error will occur when attempting to change a column heading while using MS Access 2000.
4. Under some conditions in the NT Server Multiple-Tier environment, error messages may appear garbled or blank.
